

GENDER EQUALITY PLAN

2021 - 2025

Why is gender equality important?

Gender equality is a fundamental human right. Social justice requires that everyone regardless of their age, race, class, religion, disability, sexual orientation and gender have equal rights and opportunities in society in general, including economic resources and decision-making.

Gender equality in research and innovation aims for equal participation and representation of women and men in science and technology. However, it also improves the quality and societal relevance of research and innovation and benefits European society as a whole.

Gender equality and OSM?

We are committed to building an inclusive working place and created Gender Equality Plan (GEP) to include our aims towards promoting career-development in both female and male employees to prevent the waste of talents, particularly for women, who more often drop out (or interrupt/abandon) their careers, improving decision-making by addressing gender imbalances to meet new opportunities and stimulate a gender aware culture change.

Gender equality plan is a necessary tool to level the playing field and drive the "best" and "brightest" to the top.

The Management team at O.M. Offshore Monitoring (OSM) signed up to tackle gender equality through the implementation of GEP which will create a better working environment for all and will attract and retain talents. We believe that explicitly considering different needs of women and men is not only going to improve the quality of new knowledge but also enhance the societal relevance and creating economic benefits.

Policy issued and signed by: Gabi Gudaityte

Effective from: 1st October 2021

Please note that the GEP is a flexible tool which is constructed considering the characteristics and needs of O.M. Offshore Monitoring and can be amended / updated at any time.

1. Gender in leadership and decision making
